## ShwethaKalyanaraman/vscode:extensions/handlebars/package.json

Snapshot taken 19 hours ago.	Retest now
Vulnerabilities	1 via 1 paths
Dependencies	0
Source	GitHub
Taken by	Recurring
Tested with	package.json
Repository	vscode
Branch	master
Manifest	extensions/handlebars/package.json

## MEDIUM SEVERITY

• Cross-site Scripting (XSS)

Vulnerable module: handlebars Introduced through: handlebars@1.0.0

## Detailed paths and remediation

Introduced through: handlebars@1.0.0 Remediation: No remediation path available.

## Overview

handlebars provides the power necessary to let you build semantic templates.

When using attributes without quotes in a handlebars template, an attacker can manipulate the input to introduce additional attributes, potentially executing code. This may lead to a Cross-site Scripting (XSS) vulnerability, assuming an attacker can influence the value entered into the template. If the handlebars template is used to render user-generated content, this vulnerability may escalate to a persistent XSS vulnerability.
